

1949 APBA PRO FOOTBALL SET ROSTER

The following players comprise the 1949 season APBA Pro Football Player Card Set. Players in **bold** are starters. The regular starters at each position are listed first and should be used most frequently. Realistic use of the players below will generate statistical results remarkably similar to those from real life. The number in ()s after the player name is the number of cards that the player has in this set. **IMPORTANT:** When a Red "K" appears in the R-column as the result on any kind of running play from scrimmage or on any return, roll the dice again, refer to the K-column and use the number there for the result. When a player has a "K" in his R-column, he can never be used for kicking or punting. If the symbol "FR-K" or "FR-P" appears on a player's card, it means you use the K or P column when he recovers a fumble. If there is a difference between the player's card and the roster sheet, always use the card information. See below for a more detailed explanation of new symbols on the cards.

There are many two-way players in the set, use them accordingly. The majority of teams run the T formation (two Halfbacks, one Fullback). For teams that employ the Single Wing formation (Chicago, Los Angeles), the Tailback is the primary passer while the Quarterback serves as a Blocking Back. The starting defensive lineups for all teams in this set are designed for a 5-3-3 formation.

If there is a FR-0 on a player's card, this means that whenever the player recovers a fumble, he does not advance the ball. The fumble is recovered at the spot of the fumble.
OSKR-0 Onside kick recovered, no advancement. If a player has both a kickoff designation (OA, OB or OC) and an OSKR designation, use the OSKR only in the case of an onside kick.
TC-0 Punt return with no return
TC-FC Punt return with automatic Fair Catch
OC-0 Kick return with no return
W-X(0) Interception with no return

This set uses the new quarterback designation of Quarterback*. A player rated as a QB* is treated like a regular running back and is graded as a combination running back. If you are playing a QB*, you will have to call run plays for the QB. Otherwise the QB will not have enough rushing attempts using just the scrambles in the P column.
